

New 2in1 WaveClean Cartridge

Concerns Combisteamer unit sizes 6.x, 10.x, 6.23 (Junior) & 6.1 (Compact)

This package contains the new square 2in1 WaveClean cartridges. Since the diameter is slightly smaller than the previous version, it is possible that the cartridge remains not in the holder when the holder is bent downwards.

To prevent this, the holder can be equipped easily with an adapter (10014152).

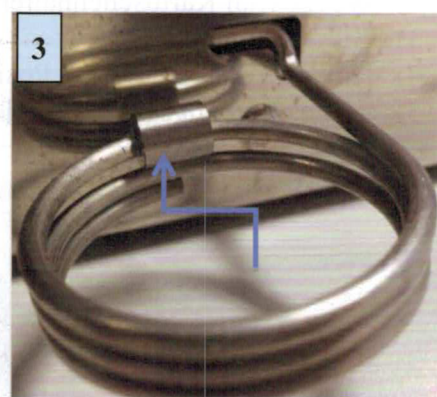

- 1) Place adapter at the end of the holder (2).
- 2) Mount adapter to the shown position (3).
- 3) Hinge the left rack back again.

New WaveClean cartridge design.

Bead adapter at the spring end. For that, bend spring.

Final adapter position.

Note

The placed cartridges should be in a vertical position. When the cartridge holder is bent downwards, the cartridge contents may not drop completely. In that case please contact your local service agent.
